

SREENATH G

Software Engineer

+91 8248603128 — vaillantsree06@gmail.com — GitHub — LinkedIn — Portfolio

Professional Summary

B.Tech Information Technology student with hands-on experience building full-stack software systems using FastAPI, React and PostgreSQL. Experienced in designing REST APIs, database schemas, authentication flows and scalable backend services. Strong foundation in Java programming, Data Structures, Object-Oriented Programming and software engineering principles.

Education

SSN College of Engineering	2024 – 2028
B.Tech Information Technology	CGPA: 8.83

Technical Skills

Languages: Java, Python, JavaScript, SQL
Core CS: Data Structures & Algorithms, OOP, DBMS
Backend: FastAPI, Flask, Node.js, REST API Design, JWT Authentication
Frontend: React.js, HTML, CSS
Databases: PostgreSQL, Oracle SQL, SQLite
Tools and Platforms: Git, GitHub, Jira, Linux

Projects

QuickConnect – Volunteer Matching Platform (Deployed)	FastAPI, React, PostgreSQL (May 2026)
- Designed and developed a full-stack platform enabling NGOs to connect with volunteers through intelligent skill, availability and location-based matching. - Engineered RESTful backend services using FastAPI with PostgreSQL, implementing JWT authentication, relational data models and assignment workflows. - Implemented a scoring-based matching algorithm using volunteer skills, geographical distance and availability for optimized assignments. - Integrated interactive maps and real-time status visualization using React and React-Leaflet.	
E-Scooter Management System (Deployed)	FastAPI, React, PostgreSQL (Jan 2026)
- Built a scalable scooter booking and management application with REST APIs handling users, vehicles and booking workflows. - Designed database schemas and optimized backend logic for reliable data handling. - Implemented validation, error handling and modular backend architecture following software engineering practices.	
Real-Time Crack Detection System	Python, YOLOv8, OpenCV (Oct 2025 – Dec 2025)
- Developed a computer vision system for real-time infrastructure crack detection and localization. - Built optimized image processing pipelines with live detection and visual feedback. - Achieved 80% mAP50 and 81.72% precision through model tuning and performance improvements.	

Leadership & Activities

- Placement Committee Member at SSN College of Engineering, coordinating placement activities and facilitating communication between students and the placement cell.
- Core Committee Member of SSN ProCodeClub, organizing technical workshops, coding events and peer-learning initiatives.
- Volunteer at SSN Youth Red Cross, contributing to social initiatives and community service activities.

Certifications

- Full Stack Web Development (Java) – DevTown
- Agentic AI Contest Certification – Student AI Chapter (SSN)
- Web Development Certification – CodSoft
